GENERAL DESCRIPTION

The power to size ratio achieved from this cabinet is quite spectacular. The SB-215 is an extremely compact, very high power, passive sub-bass cabinet in triple band pass configuration delivering 2000W RMS.

It features dual 15" transducers (4" voice coil) with rubber surround for increased levels of pressure, double spider for improved control and linearity, weather protected cone for outdoor use and ventilated voice coil for improved heat dissipation. The SB-215 has been designed to be used with the QB-12, QB-15, QB-D6 and QB-D8 to extend the low frequency support.

It is made from premium birch plywood and coated with high resistant water-based black paint, includes integrated handles, rubber feet and top hat insertion point for satellite combination with the QB Series.
